

SIMPLY THE BEST™

SAFE

Firefighters only spend a short period of time in the direct vicinity of the electric vehicle to be extinguished. The BEST is fired from a safe distance of 25ft. away.

EFFICIENT

Extinguishing the fire is time and resource efficient. Traditional methods may take hours and thousands of gallons of water. With the BEST, a single engine can extinguish the electric vehicle battery fire within the hour.

FAST

Firing in 8 milliseconds, the piercing tool can penetrate all currently known battery housings.
